RAYNESWAY BLINDS

CARE GUIDE

Cellular and pleated blinds

Gentle care for the honeycomb and pleated fabric.

Cleaning routine

Every week or two

Dust with a soft duster or use a vacuum brush attachment on a low setting, moving gently along the pleats.

When it needs more

Dab marks with a clean, damp cloth and a tiny amount of mild washing-up liquid, then dab with clear water. Let it dry fully before moving the blind. Test a hidden area first.

Do

- Raise and lower the blind slowly and evenly.
- Dust regularly so that dirt does not work into the pleats.
- Check any care label supplied with your blind.

Please avoid

- Do not soak or rub the fabric, and do not wash it in a machine.
- Do not use bleach, solvents or strong cleaners.
- Do not crush or fold the fabric. Creases in the cells can be permanent.

If something is not right

The blind sags or hangs unevenly

The cords may need re-setting. Call us rather than pulling on them.

A mark will not come out

Please do not keep scrubbing. Ask us what is safe for your fabric.

These are general guides. Always follow any care label or instructions supplied with your product, and if you are unsure about a stain, a fabric or a repair, ask us before you try anything.
