RAYNESWAY BLINDS

CARE GUIDE

Plantation shutters

Keep painted, wood and vinyl shutters clean and moving smoothly.

Cleaning routine

Every week or two

Dust the louvres with a soft duster or a microfibre cloth. Close the louvres and dust one side, then tilt them the other way and dust again. A vacuum brush attachment on a low setting also works.

Every few months

Wipe the louvres, frames and hinges with a soft cloth dampened in warm water and a drop of mild washing-up liquid. Dry straight away with a clean cloth.

Do

- Move the louvres by the tilt rod or the edge of a louvre, not by pulling on one end.
- Wipe up splashes and condensation promptly, especially in kitchens and bathrooms.
- Keep the panels clear of radiators and heaters where you can.
- Open the panels fully now and then so the hinges do not stiffen.

Please avoid

- Do not use bleach, abrasive cleaners, scouring pads or solvents.
- Do not soak the shutters or spray cleaner directly onto them.
- Do not hang anything from the panels or louvres.
- Do not force a stiff panel. Call us instead.

If something is not right

A louvre will not stay in place

The tension on the pivots may have eased. This is a quick adjustment, so get in touch rather than forcing it.

A panel rubs or does not close fully

Hinges can settle over time. We can realign them for you.

These are general guides. Always follow any care label or instructions supplied with your product, and if you are unsure about a stain, a fabric or a repair, ask us before you try anything.
